CAREER SUMMARY

- Full-Stack Developer with a background in digital administration and hands-on experience building production-level applications. Proficient in React, JavaScript, PHP, Next.js, AWS and C-programming, with a proven track record of managing mission-critical auditing tools and inventory systems. Beyond development, I bring a versatile skill set from previous roles as a Virtual and In-Person Assistant, where I successfully grew social media engagement and managed complex appointment scheduling. I am a collaborative problem-solver committed to building scalable, user-centric products using clean code and modern frameworks like React and Node.js.

SumsureIQ (Ghana) | Full-Stack Developer | [Current]

- Leading the ongoing development, cloud infrastructure management, and optimization of a mission-critical auditing application, strengthening system performance and reliability for a market research firm.
- Architected scalable features and refined user interfaces using React and PHP, deploying secure, high-availability solutions across AWS (EC2, S3, RDS, IAM) to ensure clean, maintainable code for high-impact internal tools.
- Improved data accuracy and speed by optimizing RDS MySQL queries and refining the backend architecture, resulting in a more seamless user experience for field researchers.
- Manage end-to-end production updates independently while utilizing IAM for secure role-based access control, collaborating remotely to align technical solutions with business goals.

Everything IT Technologies | Full-Stack Developer Intern | April 2025 to June 2025

- Rapidly mastered Next.js to build and deploy a full-stack inventory management system, for real-time stock tracking.
- Developed responsive front-end components and secure back-end APIs to streamline internal inventory workflows.
- Collaborated with a senior team using Figma for UI/UX prototyping and participated in code reviews to ensure alignment with industry standards.

Virtual & In-Person Assistant | January 2024 to September 2024

- Managed and grew social media accounts across multiple platforms, increasing engagement and followers through consistent content scheduling and audience interaction.

Educational Background

- MEST GHANA WEB DEVELOPMENT — April 2025
 - KNUST BSC. MEDICAL IMAGING — September 2022
-

TECHNICAL & PROFESSIONAL SKILLS

- Frontend: React, Next.js, JavaScript, HTML5, CSS3, Tailwind CSS, Responsive Design.
- Backend: PHP, MySQL, RESTful APIs, Node.js (Learning), C-programming.
- Tools & DevOps: Git, GitHub, AWS, Postman, PhpStorm, VS Code, Google AI antigravity(coding agent), Claude code.
- Design & Multimedia: Figma (UI/UX), CapCut, InShot, Video Content Creation.
- Digital Admin & Social: Virtual Assistance, Social Media Management, Appointment Scheduling, Engagement Analytics

FEATURED PROJECTS

SumsureIQ Auditing Platform (Datum Forms) | Full-Stack Developer

- Application Management: Lead the maintenance and optimization of a mission-critical auditing tool, ensuring 99% data reliability for market research field operations.
- System Architecture: Engineered a centralized AWS Lambda Layer for database connections to streamline backend architecture and ensure consistency across live functions.
- Real-Time Logic: Developed a dynamic tracking system featuring real-time UI logic that updates item availability based on user completion status, reducing data entry errors.
- Performance Optimization: Integrated PHP and MySQL backend enhancements to support scalable operations and improved UI responsiveness for remote field agents.
- Built a test environment modelled after a live application called Datum forms.

Inventory Management System | Next.js, MySQL

- Full-Stack Development: Architected an end-to-end inventory solution during an internship at Everything IT Technologies, mastering the Next.js framework on the job.
- Feature Engineering: Designed and implemented core modules for real-time stock tracking, item record management, and automated status updates.
- Security & Reliability: Integrated custom authentication and data validation protocols to ensure system integrity and secure stock-level monitoring.

E-Commerce Application | Frontend Developer & QA

- Feature Implementation: Collaborated with the BB Tech Solutions team to build responsive frontend features based on UI/UX design requirements.
- Quality Assurance: Conducted rigorous functional testing and debugging to ensure seamless usability and high-quality code deployment.
- Version Control: Utilized Git for collaborative workflows, participating in peer code reviews to maintain industry-standard application structures.

LANGUAGES

- English (fluent)
- German (beginner)
